

CLUB ANNOUNCEMENT

Tuesday, 7 September 2021

Dear Members,

INSTALLATION OF CERAFUSION TECHNOLOGY UNITS FOR CORONAVIRUS PREVENTION AT THE CLUB

In facing this pandemic, the Club continues to find new and effective ways to protect its Members from the coronavirus and to ensure Members are confident in patronising the Club with peace of mind in a safe environment at all times.

On 3 September 2021, the Club has installed Cerafusion Technology units supplied by MEDKLINN International Sdn Bhd at the Men's Changing Room, Ladies' Changing Rooms, Guest's Changing Room and the Gymnasium.

The Medklinn Cerafusion Sterilisation Technology, which uses air and surface sterilisers in all its products, meet with international health and safety guidelines on the safe use of ozone (<0.1ppm) and have CE marking to conform with European health, safety, and environmental protection standards.

Following several positive cases amid Covid-19 transmissions seeping into the Club, this latest measure aims to provide better ventilation and air purification that will give peace of mind by ensuring surfaces and indoor air is kept free from viruses while preventing the spread of the virus from occurring again.

The Club has always the best interest of its Members at heart. Safety and health is on top of our agenda for our Members. Please stay safe and continue to enjoy the Club facilities at ease.
